Case Number: #26-8639

Deceased: Reynard Armstrong **Gender:** Male Female Other **Age:** 53

Date and Hour of Death: 02/15/2026 1 AM **Date and Hour of Autopsy:** 02/17/2026 12:30 PM

Pathologist: Dr. Horace Wilberforce III

Final Diagnoses 53 year-old man was reported unresponsive by housekeeper at 9:30 AM on the morning of February 15, 2026 via 911 call. Paramedics responded, reporting signs of rigour upon attendance. Police arrived, took photos, searched and outlined the body. Victim was transported and declared deceased at Newoma Medical Centre at 11:13 AM.

Cause of Death Stroke induced by trauma. Pre-existing hypertension a possible contributing factor.

Blunt Force Injuries

- A. Cutaneous blunt force injuries to the face, particularly the left cheek and eye socket consistent with violent assault.
- B. Neck fracture.
- C. Three cracked ribs on the left side of the rib cage.
- D. Cranial fracture of skull; front right, with significant contusion and subdural hematoma in evidence.

Natural Diseases

- A. Mild Hypertensive Heart Disease in evidence with a well-documented clinical history of hypertension.

Other Observations

- A. Superficial scratches to the left leg possibly indicative of activity in thick brush or bramble.
- B. Fingernail Scrape: Inconclusive
- C. Cat hair in the nostrils consistent with pet ownership; Verified as belonging to the victim's pet.
- D. Cat hair adhering to dried blood on the face. Verified as belonging to the victim's pet.
- E. Death was not immediate as evidenced by the significant amount of swelling and bruising. It is estimated death ensued approximately 45 minutes after head and neck trauma occurred at around midnight.

Toxicology

- A. Blood drug and psychoactive substances screen negative.
- B. Blood volatile screen positive for ethyl alcohol consistent with 2 - 3 drinks several hours prior to death.
